

PRESS RELEASE

Third-quarter revenue 2008: €190m (up 39%)* Revenue to 30 September 2008: €504m (up 29%)* Pro forma revenue to 30 September 2008: €556m (up 7.5%)**

Neuilly sur Seine, 22 October 2008

Ingenico's unaudited consolidated revenue for the third quarter of 2008 was €190m (€197.9m at constant exchange rates), up 39% at constant exchange rates from the same period last year.

The pro forma increase was 3.7% in the third quarter and 7.5% for the nine months to date.

Philippe Lazare, Ingenico's CEO, commented:

"Third-quarter revenue growth is completely in line with our expectations. The integration of Sagem Monetel is continuing under excellent conditions. We confirm the objectives for the year that we have announced."

Consolidated revenue in the 3rd quarter	142.7	190.1	+33%	+39%	+3.7%
Cumulative 9-month revenue	402.8	503.9	+25%	+29%	+ 7.5%

^{*} pro forma including the Sagem Terminaux business for the periods under consideration in 2007 and 2008

On a pro forma basis, the 3.7% increase in revenue for the quarter compared with the same period in 2007, was slightly greater than in the second quarter.

This growth demonstrates the robustness of Ingenico's business model, despite the sales overlap (€7m) arising from the merger with Sagem.

Growth for the first nine months of the year, on a pro forma basis, now stands at 7.5% at constant exchange rates.

As regards profitability, the third quarter has confirmed the improving trends in operating profit from ordinary activities already seen in the first half.

- Asia/Asia Pacific. Sales in China remained very buoyant, driven by both the performance of the Ingenico China subsidiary, which has almost doubled its revenue, and sales by Fujian Landi, acquired at the end of June 2008, which amounted to €3.3m for the quarter, in line with our expectations.

Overall, business in this country amounted to nearly €11m compared with €3m in the third quarter of 2007. As was the case in the second quarter, and as expected, the Australian market has seen a fall-off following widespread EMV migration in 2007.

- **Northern Europe.** The region saw a dynamic quarter with growth having returned, in particular in Germany.
- **Southern Europe.** Although this region is the most affected by sales overlap, it is however displaying great resilience, thanks to the Group's exceptional market position. The fourth quarter should see a strong recovery in consequence.
- EEMEA. As in the previous quarters, the EEMEA zone has seen very strong growth in most areas and in particular Turkey, India, the Middle East, Africa and Eastern Europe.
- North America. Canada has reported a very good performance while the US market is marking time, as expected, due to the more difficult economic climate.
- **Latin America.** Following a weak start to the quarter, September was extremely dynamic, thanks in particular to the first deliveries under the record contract for 250,000 terminals signed in the region this fall.

C. HIGHLIGHTS OF THE THIRD QUARTER

The merger with Sagem Monetel is now operational in all sections and in all countries where the Group is present. As planned, adjustments to employee numbers at the Barcelona site will be completed at the end of November, a year earlier than initially planned.

D. OUTLOOK

Regarding the last quarter of 2008, in a much more difficult economic environment, the Group remains confident and confirms its yearly revenue growth objectives of between 7% and 10% pro forma at constant exchange rates, and its yearly objective of an operating margin of between 12% and 13%^{*}.
